

TAX SOFTWARE

Relyon Softech has launched a new software called Saral Tax Office for filing income tax returns. The makers say it is designed keeping in mind the requirements for 2007-08. It covers Income Tax Computation, FBT, Balance Sheet Preparation, Audit Report, Service Tax, Wealth Tax, TDS, ROC Filing Data and Project Reports. The back office automation covers billing and receipts, client management, document management, library for books and journals, inward and outward registers (of letters and files), petty cash accounting and forms and templates management. It permits generation of Income Tax Return (ITR forms 1 to 8) both on detailed computation basis and on summary entry. Returns can be printed and submitted to the department. It can also be submitted online through the internet. The software is competitively priced and is available in both single user and multi user version. It can be downloaded free from the website www.saraltaxoffice.com. For more information call 080-23354600 or 9449599703/9449599705 or email info@relyonsoft.com.
